Background

National Broadband Ireland (NBI) is designing, building and operating the new high-speed fibre broadband network for rural Ireland. The National Broadband Plan is the largest telecommunications project ever undertaken by the Government of Ireland. It aims to radically transform the country's broadband landscape through the delivery of quality, affordable high-speed broadband to all parts of Ireland where such services are not available commercially. Once completed, all parts of Ireland will have access to a modern and reliable broadband network, capable of supporting the communications, information, education and entertainment requirements of current and future generations.
